

JOB VACANCY

Ultrasound Service Engineer

We are looking for a keen and enthusiastic person to join our dynamic, rapidly growing business in our Medical Engineering department.

Roles & Responsibilities:

- Corrective maintenance, repair and troubleshooting of medical imaging equipment, scheduled Planned Maintenance (PM) events and installation of medical imaging equipment at base and customer's facilities
- Repair and servicing of ultrasound equipment
- Hard drive installation, software reloading and upgrade
- Liaise with OEM for software, licenses and parts relating to products
- Test, validate, and provide report on features, functions, and imaging performance for the auctions
- Provide a high level of customer satisfaction by providing ongoing maintenance, technical support, troubleshooting and repairs for ultrasound imaging equipment, to client.
- Carry data wiping tasks, to clear ultrasound system of any patient identifiable data (PID) and use appropriate software to override the empty spaces.

Key requirements:

- Knowledge and experience in working with other medical equipment such as radiology, ophthalmic, digital imaging, PACS and networking environments will be an advantage
- Help sales department in market research to aid in the understanding of market requirements
- Prior diagnostic ultrasound product experience
- Manage multiple tasks and prioritise appropriately
- Strong communication skills
- Solid team player and strong work ethic

The Hilditch Group is Europe's leading commercial auctioneers of medical equipment to the health sector, selling to customers all over the world.
